

TAPGO MASTER BLUEPRINT 2026-2035

Platform Ekosistem Digital Berbasis Membership

Perusahaan	PT TAPGO LION INDONESIA
Brand	TapGo
Founder Chairman	Ahmad Zulhi
Tagline	Satu Membership, Beragam Manfaat.
Periode	2026-2035
Status	Strategic blueprint - assumption driven
Tanggal	15 July 2026
Dokumen	Master Blueprint

Dokumen ini merupakan rencana strategis dan model keuangan internal. Proyeksi, valuasi, target, dan estimasi di dalamnya didasarkan pada asumsi yang dapat berubah. Dokumen ini bukan penawaran efek, jaminan keuntungan, audit keuangan, atau appraisal independen.

Table of Contents

1. Executive Summary
2. Company Profile
3. TapGo 2035 Vision
4. Business Model Canvas
5. Product Blueprint
6. Founder Program
7. Market Opportunity
8. Go-To-Market & Marketing
9. Technology Blueprint
10. Security, Risk & Compliance
11. Organizational Blueprint
12. Modal Investasi
13. Modal Kerja
14. Fixed Cost
15. Variable Cost
16. Membership Economics
17. Bonus Liability Model
18. Five-Year Financial Projection
19. Balance Sheet
20. Cash Flow
21. Break-Even Analysis
22. Unit Economics
23. Funding Strategy
24. Valuation
25. KPI Dashboard
26. Corporate Roadmap
27. SOP & Operations
28. Investment Case
29. Executive Book

Strategic Disclaimer

Dokumen ini merupakan rencana strategis dan model keuangan internal. Proyeksi, valuasi, target, dan estimasi di dalamnya didasarkan pada asumsi yang dapat berubah. Dokumen ini bukan penawaran efek, jaminan keuntungan, audit keuangan, atau appraisal independen.

Seluruh angka di dokumen ini dipisahkan menjadi kondisi aktual, target, proyeksi, asumsi, dan aspirasi. Tidak ada proyeksi yang boleh diperlakukan sebagai jaminan hasil.

Executive Summary

Menjelaskan posisi strategis TapGo sebagai platform ekosistem digital berbasis membership.

- TapGo menghubungkan anggota, merchant, komunitas, dan layanan digital melalui satu identitas membership.
- Membership adalah pintu masuk ekosistem, bukan satu-satunya sumber pendapatan.
- Aktual per Juli 2026: produk berada pada tahap pre-production, readiness Google Play, dan payment gateway production preparation.
- Target 2026: launch Android, stabilisasi pembayaran DOKU, founder program, membership, wallet, referral, dan admin console.
- Strategi 2026-2035 disusun bertahap: Banten launch, Jabodetabek expansion, national ecosystem, AI, analytics, dan enterprise API.

Executive Dashboard

Metric	Status
Current Stage	Pre-Production / Internal UAT
Product Readiness	Android, backend, admin, payment integration preparation
Funding Requirement	Illustrative seed range Rp2-5 miliar, owner confirmation required
Break-Even Target	Base scenario: estimated 2029, assumption-driven
Key Risk	Payment activation, bonus liability, compliance, user acquisition

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Executive Summary, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.

- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Executive Summary - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Executive Summary - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Executive Summary - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Company Profile

Mencatat identitas resmi, visi, misi, nilai, dan governance perusahaan.

- Perusahaan: PT TAPGO LION INDONESIA.
- Brand: TapGo.
- Founder Chairman: Ahmad Zulhi.
- Website: <https://tapgolion.id>.
- Visi 2035: menjadi salah satu platform ekosistem digital berbasis membership terbesar di Indonesia yang menghubungkan jutaan anggota, merchant, komunitas, dan berbagai layanan digital melalui satu identitas keanggotaan yang aman, terpercaya, dan bernilai.
- Nilai perusahaan: integritas, transparansi, inovasi, keamanan, kebermanfaatan, pertumbuhan berkelanjutan, dan kepatuhan.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Company Profile, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Company Profile - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Company Profile - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Company Profile - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

TapGo 2035 Vision

Mendefinisikan north star vision dan peta capaian 2026-2035.

- 2026: Launch Android, Membership, Wallet, Referral, Payment Gateway, Founder Program.
- 2027: PPOB penuh, merchant ecosystem, QRIS melalui partner resmi, merchant dashboard.
- 2028: marketplace, travel services, insurance/financial protection melalui mitra berizin, iOS.
- 2029: POS, CRM, business tools, enterprise services.
- 2030: target 250.000 active members dan 20.000 merchant sebagai milestone nasional.
- 2031-2035: aspirasi 1-5 juta active members, AI customer service, AI recommendation, merchant analytics, API/enterprise platform.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk TapGo 2035 Vision, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

TapGo 2035 Vision - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

TapGo 2035 Vision - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

TapGo 2035 Vision - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Business Model Canvas

Merangkum customer, value proposition, channel, revenue, partner, aktivitas, resource, dan biaya.

- Customer segments meliputi masyarakat umum, pekerja, freelancer, mahasiswa, UMKM, merchant, komunitas, agen layanan digital, dan mitra usaha.
- Value proposition: satu membership untuk berbagai manfaat, akses layanan digital, peluang usaha, referral transparan, wallet dan ledger, serta merchant ecosystem.
- Revenue streams: membership, PPOB margin, merchant fee, marketplace fee, withdrawal/admin fee jika berlaku, subscription, advertising, enterprise, API, dan premium feature.
- Key partners: DOKU, Midtrans fallback, Google Play, cloud provider, WhatsApp provider, merchant, bank/financial institutions, dan partner berizin.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Business Model Canvas, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Business Model Canvas - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Business Model Canvas - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Business Model Canvas - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Product Blueprint

Membedakan produk aktual dan roadmap produk jangka panjang.

- Current core: Basic, Silver, Gold, Platinum, Founder Chairman, Founder Platinum, Referral, Level Bonus, Wallet, Ledger, Withdrawal, Admin Console, Payment Checkout, DOKU primary, Midtrans fallback.
- Roadmap: PPOB, Merchant, QRIS melalui mitra resmi, Marketplace, Travel, Insurance partner, POS, CRM, Business subscription, AI support, Merchant analytics, API enterprise.
- Setiap modul harus dinilai dari problem solved, target user, value, revenue potential, dependency, regulatory consideration, dan target tahun.

Dimension	Conservative	Base / Moderate	Growth / Aggressive
User growth	Controlled	Measured Banten to Jabodetabek	Faster regional scale
Cost discipline	Strict	Balanced	Growth investment
Risk posture	Low appetite	Managed risk	Higher execution load

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Product Blueprint, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Product Blueprint - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Product Blueprint - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Product Blueprint - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Founder Program

Menjelaskan posisi Founder Chairman dan Founder Platinum tanpa memasukkan data sensitif.

- Founder Chairman maksimal 1 akun, posisi tertinggi, Founder ID FCH-001, dan tidak masuk kuota Founder Platinum.
- Founder Platinum maksimal 10 akun, membership kehormatan, tidak membuat invoice/revenue, tidak mendapat saldo PPOB awal.
- Founder dapat menerima bonus dari transaksi downline valid jika status ACTIVE.
- Founder tidak boleh dipindahtangankan, tidak boleh dihapus, dan status hanya ACTIVE, SUSPENDED, REVOKED.
- Seluruh perubahan status wajib memiliki audit trail.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Founder Program, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Founder Program - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Founder Program - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Founder Program - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Market Opportunity

Membangun model pasar bertanggung jawab tanpa mengarang data aktual.

- Market opportunity disusun sebagai Illustrative Market Model karena data pasar final masih perlu verifikasi owner dan sumber eksternal.
- Area analisis: digital economy Indonesia, mobile usage, UMKM, digital payment adoption, PPOB, community commerce, dan membership economy.
- Target market awal: Banten sebagai launching market, dilanjutkan Jabodetabek, lalu ekspansi regional nasional setelah validasi.
- TAM/SAM/SOM pada workbook adalah asumsi editable, bukan data aktual.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Market Opportunity, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Market Opportunity - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Market Opportunity - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Market Opportunity - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Go-To-Market & Marketing

Mendefinisikan funnel, channel, KPI, dan akuisisi member/merchant.

- Member acquisition: founder network, referral, community, social media, TikTok, Instagram, WhatsApp, SEO, partnership, dan merchant-led acquisition.
- Merchant acquisition: direct sales, community, regional coordinators, partnerships, onboarding program, incentive, dan training.
- Marketing funnel: Awareness, Interest, Registration, Verification, Membership, First Transaction, Repeat Transaction, Referral, Retention.
- KPI: CAC, conversion, activation, retention, churn, referral rate, repeat transaction, active member ratio, dan merchant activation.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Go-To-Market & Marketing, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Go-To-Market & Marketing - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Go-To-Market & Marketing - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Go-To-Market & Marketing - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Technology Blueprint

Menjelaskan arsitektur aktual dan roadmap teknis realistis.

- Aktual: Flutter Android user app, Flutter driver app, Node.js backend, REST API, PostgreSQL, Redis, DOKU primary, Midtrans secondary/fallback, GitHub, versioning, Google Play readiness.
- 2026: monolithic modular backend.
- 2027: service separation hanya jika traffic membutuhkan.
- 2028: event-driven processing.
- 2029: multi-region/high availability jika justified.
- 2030+: data platform, AI, analytics, enterprise APIs.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Technology Blueprint, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Technology Blueprint - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Technology Blueprint - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Technology Blueprint - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Security, Risk & Compliance

Membuat risk register dan kontrol utama.

- Kontrol utama: authentication, authorization, role-based access, server-side validation, payment signature, webhook verification, idempotency, audit trail, encryption in transit, secret management, backup, disaster recovery.
- Fraud focus: referral abuse, duplicate accounts, payment reconciliation, KYC, data privacy, account deletion, Google Play compliance.
- Risk register mencakup probability, impact, mitigation, owner, dan early warning indicator.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Security, Risk & Compliance, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Security, Risk & Compliance - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Security, Risk & Compliance - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Security, Risk & Compliance - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Organizational Blueprint

Menentukan organisasi bertahap dan manpower plan.

- Stage 1: Founder/CEO, CTO/Product, Backend, Flutter, Operations, Finance, Customer Support, Marketing.
- Stage 2: Product Team, Engineering Team, Growth Team, Merchant Operations, Risk & Compliance, Finance & Accounting, Customer Experience.
- Stage 3: regional operations, enterprise partnership, data/AI, security, internal audit.
- Gaji dan headcount pada model adalah asumsi dan perlu konfirmasi owner.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Organizational Blueprint, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Organizational Blueprint - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Organizational Blueprint - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Organizational Blueprint - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Modal Investasi

Menghitung baseline initial investment dan klasifikasi biaya.

- Baseline moderat: product development Rp350 juta, infrastructure setup Rp75 juta, device/equipment Rp75 juta, branding Rp30 juta, legal/compliance/HKI Rp40 juta, initial marketing Rp100 juta, office/setup Rp50 juta, contingency Rp80 juta.
- Total baseline: Rp800 juta.
- Nilai aktual sunk cost, capitalizable assets, dan kebutuhan dana baru perlu konfirmasi owner.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Modal Investasi, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Modal Investasi - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Modal Investasi - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Modal Investasi - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Modal Kerja

Menghitung kebutuhan working capital 6, 12, dan 18 bulan.

- Baseline monthly operating budget moderat: Rp159,5 juta per bulan.
- Runway 6 bulan: Rp957 juta.
- Runway 12 bulan: Rp1,914 miliar.
- Runway 18 bulan: Rp2,871 miliar.
- Minimum cash reserve dan emergency reserve dihitung di workbook.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Modal Kerja, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Modal Kerja - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Modal Kerja - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Modal Kerja - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Fixed Cost

Menyusun fixed cost bulanan dan tahunan 2026-2030.

- Komponen: salaries, office, internet, software, accounting, legal, compliance, base cloud, monitoring, customer support, insurance, admin.
- Semua nilai fixed cost adalah asumsi editable pada Excel.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Fixed Cost, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Fixed Cost - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Fixed Cost - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Fixed Cost - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Variable Cost

Menyusun driver variable cost dan biaya skala transaksi.

- Driver: payment gateway fee, OTP, WhatsApp, email, cloud usage, storage, CDN, support scaling, merchant acquisition, referral bonus, level bonus, reward, transfer cost, fraud loss, refund/chargeback, tax.
- Tarif gateway tidak dikarang; gunakan assumption cells yang dapat diisi setelah kontrak final.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Variable Cost, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Variable Cost - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Variable Cost - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Variable Cost - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll tabs
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Membership Economics

Membuat waterfall per paket membership.

- Harga: Basic Rp0, Silver Rp500.000, Gold Rp3.000.000, Platinum Rp5.500.000.
- Waterfall menghitung gross revenue dikurangi payment gateway, PPOB benefit, merchandise, partner benefit, sponsor bonus, level bonus, reward provision, tax, dan operational allocation.
- Margin positif tidak disimpulkan sampai biaya partner final terkonfirmasi.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Membership Economics, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Membership Economics - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Membership Economics - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Membership Economics - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Bonus Liability Model

Menghitung exposure bonus dan stress test payout.

- Level bonus: 8%, 4%, 2%, 2%, 2%, 1%, 1%, 1%, 1%, 1%.
- Model mencakup maximum payout ratio, actual payout ratio, qualification adjustment, unearned bonus, reserve, fraud reserve, dan liability exposure.
- Stress test: 25%, 40%, 60%, dan worst-case network concentration.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Bonus Liability Model, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Bonus Liability Model - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Bonus Liability Model - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Bonus Liability Model - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Five-Year Financial Projection

Membangun proyeksi 2026-2030 untuk tiga skenario.

- Model mencakup users, active users, paid members, package mix, merchant, transaction count, GMV, revenue, cost of revenue, gross profit, opex, EBITDA, EBIT, tax, net profit, working capital, capex, dan free cash flow.
- Skenario: Conservative, Base/Moderate, Growth/Aggressive.
- Semua formula terhubung ke assumption sheet.

Dimension	Conservative	Base / Moderate	Growth / Aggressive
User growth	Controlled	Measured Banten to Jabodetabek	Faster regional scale
Cost discipline	Strict	Balanced	Growth investment
Risk posture	Low appetite	Managed risk	Higher execution load

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Five-Year Financial Projection, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Five-Year Financial Projection - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Five-Year Financial Projection - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Five-Year Financial Projection - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Balance Sheet

Membuat proyeksi neraca berbasis model finansial.

- Assets: cash, receivables, prepaid expenses, equipment, software development asset jika memenuhi kebijakan akuntansi.
- Liabilities: payables, bonus liability, tax, deferred revenue, partner liability, loans jika ada.
- Equity: paid-in capital, retained earnings, investor funds.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Balance Sheet, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Balance Sheet - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Balance Sheet - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Balance Sheet - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Cash Flow

Membangun arus kas dan runway.

- Cash flow mencakup operating, investing, financing, ending cash, minimum cash threshold, monthly burn, dan runway.
- Workbook menyertakan cash runway chart 24 bulan.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Cash Flow, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Cash Flow - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Cash Flow - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Cash Flow - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Break-Even Analysis

Menghitung break-even paid members, revenue, transaction volume, merchant count, dan month.

- Analisis sensitivity mencakup package mix, bonus payout, CAC, dan fixed cost.
- Break-even adalah model ilustratif, bukan janji kinerja.

Dimension	Conservative	Base / Moderate	Growth / Aggressive
User growth	Controlled	Measured Banten to Jabodetabek	Faster regional scale
Cost discipline	Strict	Balanced	Growth investment
Risk posture	Low appetite	Managed risk	Higher execution load

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Break-Even Analysis, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Break-Even Analysis - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Break-Even Analysis - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Break-Even Analysis - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Unit Economics

Mengukur CAC, LTV, margin, payback, activation, retention, churn, ARPU, ARPPU, dan merchant revenue.

- Data aktual belum tersedia; workbook menyediakan placeholders editable.
- Setiap metrik perlu diisi dengan data cohort setelah launch.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Unit Economics, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Unit Economics - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Unit Economics - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Unit Economics - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Funding Strategy

Menyusun milestone pendanaan tanpa menyatakan dana sudah diperoleh.

- Bootstrapping / Founder Capital.
- Seed illustrative range: Rp2-5 miliar.
- Pre-Series A hanya setelah repeatable acquisition dan unit economics mulai tervalidasi.
- Series A hanya setelah product-market fit dan kontribusi margin positif.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Funding Strategy, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Funding Strategy - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Funding Strategy - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Funding Strategy - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Valuation

Menyusun pendekatan valuasi dengan disclaimer early-stage.

- Metode: Revenue Multiple, EBITDA Multiple, DCF, Venture Capital Method.
- Valuasi ditampilkan sebagai range yang sangat sensitif terhadap asumsi.
- Bukan appraisal resmi.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Valuation, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Valuation - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

Valuation - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

Valuation - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

KPI Dashboard

Menentukan KPI member, merchant, payment, finance, marketing, dan operations.

- Member: registered, active, paid, churn, retention.
- Merchant: registered, active, GMV, revenue.
- Payment: success rate, webhook success, refund, chargeback.
- Finance: revenue, gross margin, EBITDA, burn, runway, cash.
- Operations: ticket SLA, NPS, uptime, fraud rate.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk KPI Dashboard, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

KPI Dashboard - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria
2026	Banten launch and core ecosystem	Registration, paid conversion, payment success	DOKU, Google Play, support SOP	Payment stable and first cohort measured
2027	Jabodetabek expansion	Active members, merchant activation	Merchant ops and repeatable acquisition	CAC and retention within target band
2028	Partner services and marketplace	Transaction repeat rate, GMV quality	Partner contracts and compliance	Positive contribution margin by segment
2029	Business platform	Merchant tools adoption	Product and data capability	Enterprise use cases validated
2030+	National ecosystem and AI	Scale, uptime, analytics	Data governance and infrastructure	Regional playbook repeatable

Execution rule: ekspansi harus mengikuti data traction dan kesiapan operasional, bukan narasi agresif. Jika KPI cohort belum stabil, budget dialihkan ke retention, support, dan risk control.

KPI Dashboard - KPI, Risk, and Governance

KPI digunakan untuk memisahkan pertumbuhan sehat dari pertumbuhan yang menghasilkan liability tinggi. Governance memastikan keputusan produk, marketing, dan finance tetap dapat diaudit.

Governance Area	KPI / Control	Owner	Reporting Cadence
Growth	Registered, active, paid conversion, CAC, churn	Growth Lead	Weekly
Finance	Revenue, bonus liability, burn, runway, cash reserve	Finance	Weekly / Monthly
Payment	Success rate, webhook success, pending aging, reconciliation	Operations	Daily
Risk	Duplicate accounts, suspicious referral, refund, complaint rate	Risk & Compliance	Weekly
Product	Crash-free session, API uptime, latency, release defects	Product/Tech	Weekly

Early warning indicators harus menjadi trigger review sebelum menambah budget akuisisi. Contoh: payment pending naik, bonus payout ratio melewati guardrail, atau CAC meningkat tanpa retention.

KPI Dashboard - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Corporate Roadmap

Menampilkan roadmap visual 2026-2035 dengan milestone, KPI, budget, dependency, dan exit criteria.

- 2026: Product Launch.
- 2027: Transaction & Merchant Expansion.
- 2028: Marketplace & Partner Services.
- 2029: Business Platform.
- 2030: National Ecosystem.
- 2031-2035: AI, Enterprise, National Scale.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Corporate Roadmap, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

SOP & Operations

Meringkas SOP operasional pada level blueprint.

- SOP mencakup member onboarding, merchant onboarding, payment reconciliation, withdrawal, fraud, complaint, refund, account deletion, incident response, backup, DR, access control, financial closing, internal audit.
- Dokumen teknis SOP terpisah menjadi referensi operasional.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk SOP & Operations, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual

Investment Case

Merangkum alasan strategis TapGo menarik untuk investor/partner tanpa menjanjikan ROI.

- Why TapGo: scalable membership-led ecosystem, multiple revenue streams, proprietary technology, referral-driven growth, merchant expansion, digital payment infrastructure, documented governance, long-term roadmap.
- Investment risks, expected milestones, potential exit options, dan strategic partnership opportunity disampaikan dengan disclaimer.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Investment Case, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual

Executive Book

Menjadi ringkasan cepat untuk pembaca investor 10-15 menit.

- Executive book mencakup opportunity, solution, product, market, business model, readiness, financial highlights, funding ask, roadmap, team, risk, closing.
- Versi ringkas dibuat sebagai PDF terpisah 15-25 halaman.

Blueprint Interpretation

Bagian ini harus dibaca sebagai pedoman strategis. Untuk Executive Book, status aktual dan target masa depan dipisahkan agar tidak terjadi salah tafsir antara readiness saat ini dan aspirasi 2035.

Area	Aktual per Juli 2026	Target / Roadmap	Asumsi / Dependency
Produk	Pre-production dan readiness	Scale bertahap	Payment, compliance, team
Operasi	Core process disusun	SOP dan dashboard meningkat	Owner confirmation
Keuangan	Model ilustratif	Unit economics divalidasi	Data transaksi aktual
Risiko	Known risk listed	Mitigation tracked	Governance discipline

Decision Notes

- Semua keputusan investasi perlu memakai data aktual setelah launch.
- Setiap angka target wajib direvisi setelah cohort dan transaksi pertama tersedia.
- Regulasi payment, wallet, insurance, dan financial services harus mengikuti izin/partner resmi.
- Model bonus perlu rekonsiliasi berkala untuk mencegah liability tidak terkendali.

Owner Confirmation Required

Konfirmasi owner dibutuhkan untuk biaya aktual, status partnership, legal/regulatory scope, budget marketing, headcount hiring, dan final product sequencing.

Executive Book - Roadmap and Execution Logic

Roadmap berikut bersifat staged dan harus divalidasi melalui milestone operasional. Setiap tahap memiliki dependency, KPI, dan exit criteria agar ekspansi tidak dilakukan sebelum model bisnis cukup terbukti.

Year	Milestone	KPI Focus	Dependency	Exit Criteria

Executive Book - Financial and Operational Assumptions

Bagian ini merangkum dampak finansial dan operasional yang harus dihubungkan ke model Excel. Angka final harus diperbarui setelah data aktual tersedia.

Assumption Group	Current Status	Model Treatment	Owner Confirmation
Revenue	Pre-production; no claim as actual revenue	Formula-driven projection	Package mix and transaction data
Cost	Baseline assumptions	Fixed and variable cost tabs	Vendor quotes and payroll
Bonus Liability	Business rule documented	Stress-tested payout ratios	Actual qualification and fraud rate
Funding	Illustrative range	Funding and cash flow sheets	Investor terms and timing
Compliance	Payment/Play readiness	Risk register and go/no-go gates	Legal and partner status

No financial outcome in this section is a guarantee. Semua hasil tergantung eksekusi, partner approval, regulasi, market response, dan disiplin biaya.

Risk Register Summary

Risk	Probability	Impact	Mitigation	Owner	Early Warning
Referral fraud	Medium	High	Device/IP monitoring, audit, manual review	Risk	Duplicate pattern
Cash flow stress	Medium	High	Runway dashboard, payment reserve	Finance	Burn > budget
Payment failure	Medium	High	DOKU primary, Midtrans fallback, reconciliation	Ops	Webhook error
Regulatory risk	Medium	High	Partner berizin, legal review	Compliance	Policy change
Data breach	Low-Med	High	Access control, encryption, incident response	Security	Anomaly

KPI Dashboard Summary

Category	KPI	Target Use
Member	Registered, active, paid, churn, retention	Growth quality
Merchant	Registered, active, GMV, revenue	Ecosystem scale
Payment	Success rate, webhook success, refund, chargeback	Reliability
Finance	Revenue, margin, EBITDA, burn, runway	Capital discipline
Operations	Ticket SLA, NPS, uptime, fraud rate	Service quality

Financial Model Checks

Check	Meaning
Balance Sheet	Assets equal liabilities plus equity
Cash Flow	Ending cash reconciles to balance sheet cash
Scenario	Scenario selector changes growth and cost assumptions
Formula errors	Workbook scans should show no visible #REF or #DIV/0 errors
